Task 3

Write a program which reads an odd natural number n and writes on the console a symmetric 'kite' consisting of asterisks: in the first line n stars, in the second line $n - 2$ stars, ... , in n-th – one star. For example, for $n = 7$ the output should look like this:

```
*******
 *****
  ***
   *
```

Deadline: November 6 (inclusive)

Put yout Java file(s), and only Java files, in a directory the name of which is your surname (without Polish or any other non-ASCII characters). Names of Java files are arbitrary, although of course they should correspond to names of classes you created. Zip the whole directory ("from above" — not just the files inside it). Then drop the zip file created in this way into folder "Foldery zadań / Task_XX" of the EDUX system (where 'XX' is the task number).
